

## Junior Project Engineer (Permanent)

### About the role:

Blighter Surveillance Systems is looking to recruit a Junior Project Engineer to contribute to the delivery and development of Blighter radar systems and projects. The role involves;

- System-level design, architecture, and specification of Blighter radar systems and installations.
- Managing Blighter radar systems projects.
- Interfacing with customers and suppliers to establish and develop requirements
- Implementing and delivering completed solutions.
- Working hands-on with Blighter radars and supporting systems as required.

The engineering team at Blighter is small and flexible. We are looking for someone capable of working on their own initiative, but who can also collaborate and communicate effectively with other engineers and end users. Training on Blighter radars will be provided.

You will have all the following skills and abilities:

- Have an appreciation of multiple engineering disciplines.
- Have an appreciation of project/engineering management methods and tools (Gantt charts, resourcing, etc).
- Be able to create and maintain system diagrams using MS Visio or similar.
- Be able to work effectively within a team.
- Have a logical approach to problem solving.

The following would also be an advantage:

- Experience of radar systems.
- Experience or education of any of the following;
  - Electrical or Electronic Engineering
  - Software Engineering/Computer Science
  - Mechanical Engineering
  - Systems Engineering
- Experience working with a variety of customers and suppliers.

Candidates should have some system engineering experience with a degree or equivalent qualification in a numerate subject. Recent graduates who have completed a sandwich course or year in industry will also be considered. The role will include occasional visits to customers and suppliers in both the UK and overseas so a driver's licence would be considered beneficial.

### About Blighter:

BSS is a UK-based electronic-scanning radar and sensor solution provider delivering an integrated multi-sensor package to systems integrators comprising Blighter electronic-scanning radars, cameras, thermal imagers, trackers and software solutions. Blighter Surveillance Systems (BSS) is looking to increase its in-house design and development team in support of new product developments and enhancements. We are located 10 miles south of Cambridge in the semi-rural village of Great Chesterford, with ample parking, a railway station on the Liverpool St. – Cambridge line and easy access to the M11.
