

## **Technician (permanent)**

### **About the role:**

We are seeking to recruit an enthusiastic and flexible Technician to join the Production team of our small but expanding company. The successful candidate will perform a range of support tasks for the engineering and production teams, involving building prototype and pre-production assemblies and wiring harness assemblies.

This role would suit someone with some experience of wiring, soldering and electro-mech assembly techniques already and keen to get involved in some new challenges.

### **About Blighter:**

Blighter Surveillance Systems (BSS) designs and sells radar systems that are used for detecting people, drones and vehicles along country borders and site perimeters. The radars use advanced electronic scanning and other patented technology to achieve industry leading performance and reliability. Blighter radar manufacture is managed via outsourcing to our key manufacturing suppliers, principally in the UK. Final system configuration, test and preparation for delivery are managed on site. We are located 10 miles south of Cambridge in the semi-rural village of Great Chesterford, with ample parking, a direct train link to Cambridge and easy access to the M11. For more information see [www.blighter.com](http://www.blighter.com).

### **Duties / Responsibilities:**

Typically to include, though not limited to the following:

1. Build prototype assemblies and wiring /cable harnesses.
2. Documenting and reporting issues arising.
3. Modification/repair of assemblies.
4. Interface with and support Engineering and Production staff as required.

Although the role is based at our Great Chesterford office, some travel may be required in the UK and, occasionally, overseas.

### **Essential skills and knowledge:**

The successful candidate will be able to demonstrate the following:

1. Practical, best practice 'hands on' skills in creation of prototype electronic assemblies.
2. Good written and spoken communication skills.
3. A qualification in an engineering related discipline
4. Familiarity with technical documentation (drawings, specifications)
5. The ability to multi-task, and work accurately under time pressure.
6. Flexible in approach, and ability to deal with changing requirements.
7. A full UK driving licence
